Routeware Pulse

Your Operational Data, Working for You

Routeware Pulse is the data and analytics platform for waste and recycling operations. It connects directly to the Routeware products you already use and gives every team two ways to put that data to work: dashboards that keep you on top of the operation, and plain-English answers to the questions that come up every day.

No exports, no spreadsheets and no waiting on a report. Just the data you need, when you need it, without relying on technical staff.

TWO WAYS TO USE YOUR DATA

PULSE INSIGHTS

Monitor your operation

Ready-to-use dashboards and reports that refresh daily, so you always know how routes, services, customers and revenue are performing.

- Pre-built dashboards for routes, drivers, service reliability, billing and more
- Build, share and drill into reports in a familiar, spreadsheet-like interface
- Refreshed daily from your Routeware data

PULSE INTELLIGENCE

Ask your operation anything

Type a question in plain English and get the answer in seconds, as a summary, a table or a chart.

- Use the words your team already uses, including route names and service codes
- Follow up naturally: “What about last month?” “Show that as a chart.”
- Every answer shows how it got there, so you can check any figure

BETTER TOGETHER

Use Insights to monitor the operation and Intelligence to ask “why” and “which one.”

WHAT IT MEANS FOR HAULERS

Turn operational data into a competitive advantage.

Protect revenue

Dashboards flag billing gaps, revenue leakage and payment issues. Ask "Which accounts are slipping?" to see where to act first.

Answers on the front line

Dispatchers and supervisors get up-to-date numbers when they need them, not after the weekly report lands.

Know your profitability

See revenue and profitability by route, service code and region, then ask which customers grew the most this quarter.

Close the month faster

AR aging, payments and invoice summaries are ready without pulling them by hand.

WHAT IT MEANS FOR MUNICIPALITIES

Deliver reliable service and stay accountable to your community.

Ready for council and oversight

Consistent performance data is always on the dashboard, and you can answer council questions in minutes instead of days.

Get ahead of resident complaints

See missed collection patterns daily, then ask which routes they were on.

Support sustainability goals

Tonnage, participation and set-out trends are ready for environmental reporting.

Back every budget request

Pull the numbers behind a budget submission in a few questions.

EASY TO START. EASY TO TRUST.

- **Works with what you have** - Connects to SmartCity, RCC, Elements and EnCore, with ReCollect and more Routeware products on the way.
- **Your data stays yours** - Each user sees only their organization's data, and Pulse Intelligence never changes it.
- **Refreshed daily** - Data refreshes daily, so questions about yesterday, last week and last quarter always have current answers.
- **Nothing to install** - It's cloud-hosted and opens in any browser at pulse.routeware.com.
- **Minutes to learn** - With prebuilt dashboards and plain-English questions, teams get value on day one.

Our services may utilize artificial intelligence (AI), machine learning, or automated processing technologies ("AI Tools") to generate content, provide recommendations, analyze data, or assist in delivering features to you.

STOP HUNTING FOR ANSWERS. START ASKING.
